

Wound Care

Our wound care module is a certified EMR system, that can work stand alone or integrated in our All in One CVIS to manage all clinical, financial, and regulatory requirements for your hospital or outpatient wound care center. Medstreaming wound care system provides the tools to enhance patient care and facility performance across the wound care continuum.

Medstreaming Wound Care Module supports a 100% paperless patient record and is configurable to your facility's needs. It integrates seamlessly with your hospital's EMR strategy.

Wound Care Module can be utilized for:

- Outpatient Wound Clinics
- Long Term Acute Care
- Skilled Nursing Facilities
- Inpatient Care
- Visiting Physicians

All-In-One [EMR - PACS - PM - RCM]

Medstreaming is a fully comprehensive system IT solution in a single platform architecture. Our system includes Office Visits, Image management, Vascular, Cardiac reporting, EMR, Inventory, Nursing workflow, Data Analytics, Accreditation for treating Vein, Arterial, Dialysis Access, and Cardiac diseases integrated with Wound Care. The integrated system eliminates unnecessary interfaces and brings clinical data to the point of care. Integration with registry interfaces allows captured structured data to feed directly into registries eliminating the need for costly manual entry into registry pathways.

Complete System Running in the Cloud

With our system running the cloud and fully certified billers assisting your practice or ASC, you have a complete turn-key solution that allows you to focus on the clinical side of your business. Complete inventory management system, MIPS consultation and compliance as well as data analytics and registry integration, registry abstraction services, will make you feel that you have a much bigger team.

Analytics and Data Mining

[Reports, Dashboards, BI, Ad-Hoc]

Features

- Full wound documentation
- Wound measurements
- Wound treatment documentation
- Wound photography & annotation
- Wound assessment and care planning documentation
- Dressing documentation
- Evaluation module
- Management module
- Nursing assessment
- Nurse visits
- Checklists for patient evaluation
- Adherence to plan of care
- Family education
- Physician orders
- Hyperbaric pressure chamber
- Insurance authorization tracking and recording
- Outcomes and benchmarking reports
- MIPS and MACRA support

Process

Smooth implementation with minimal disruption to client operations and continuous process analysis to improve efficiencies.
